

SEA SAVE FOUNDATION

Sea Save Foundation stands witness to the health of the oceans and the threats they face, we document problems and develop solutions, arm people with knowledge, and tools so they can make a difference. With the public as our ally, we go to the United Nations and other global bodies to affect international change. We attend these meetings so we can offer creative, economically viable, sustainable, and environmentally friendly plans to decision-makers.

Sea Save Foundation is a small non-partisan, non-profit that makes a big impact in advancing science based public policy regarding issues affecting our ocean and marine ecosystems.

We make real world differences by:

- Recommending economically viable, sustainable, and environmentally friendly global advocacy directly to decision-makers at the United Nations and CITES meetings
- Encouraging stewardship through education with our acclaimed newsletter, "Ocean Week in Review"
- Collaborating with a talented team of experts and activists across the globe

**BECAUSE OCEANS
DON'T RECOGNIZE
POLITICAL BORDERS**

With every wave that crashes, every tide that turns, we're reminded of the urgency. It's time to act, and with your help, we can.

OUR GLOBAL COLLABORATIONS

“Ocean Week in Review” Celebrates 10 Years

OWIR is a crucial weekly digest that encapsulates vital oceanic news for its ever-growing readership. Over 520 editions with 15,000 story summaries published.

Convention of International Trade of Endangered Species

Aligning with CITES, we safeguard marine species from the threat of international trade.

United Nations SDG #14

Championing the United Nations' SDG# 'Life Below Water', we work tirelessly to promote marine conservation at a global scale.

STAY INFORMED

Free Weekly eNewsletter

Subscribe to our journal and receive a curated list of top ocean news, ensuring you're always informed and empowered to make a difference.

Global Policy Changes

We are actively working towards influencing policies that address the pressing issues of plastic pollution and drastic impacts of climate change.
